PROFESSIONAL SUMMARY

Software Engineer and Unity Developer with professional experience centered on C#, Unity, and object-oriented programming. Build gameplay systems, internal tools, procedural content, and maintainable game architecture, with hands-on work in debugging, refactoring, performance profiling, and runtime optimization. Currently contributing at a mid-level scope on commercial game projects and collaborating across programming, Game Design, and audio disciplines. Open to remote international Software Engineer roles in game development, gameplay systems, and Unity.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript

Engines & Frameworks: Unity, Three.js, PixiJS, Node.js; Unreal Engine

Game Programming: Gameplay Systems, State Machines, Event-Driven Systems, Procedural Generation, Game Physics, Raycasting, UI Systems, Save/Load Systems

Software Engineering: Object-Oriented Programming (OOP), SOLID Principles, Design Patterns, Software Architecture, Data Structures & Algorithms, Debugging, Refactoring, Code Review

Performance: Performance Profiling, Runtime Optimization, Draw Call Optimization, Object Pooling, Unity Profiler

Tools & Middleware: Git, GitHub, FMOD, DOTween

Platforms: PC, Android, WebGL

PROFESSIONAL EXPERIENCE

Mikan Studio — Mid-Level Software Engineer | Unity / C#

Jun 2025 – Present | Remote | Contractor

• Develop gameplay systems, internal tools, game mechanics, and project architecture in Unity and C# across multiple game projects.

• Designed and implemented from scratch a dynamic procedural map generation and progression system for Kundara: Art of Cards, using rule-based node generation, branching and converging paths, and ScriptableObject-driven content.

• Build and maintain Unity architecture using managers, state machines, event-driven systems, interfaces, ScriptableObjects, and separation of responsibilities.

• Create internal Unity tools for QA and Game Design, including configurable Build Modes for test builds and development of a Save Editor to improve testing workflows.

• Profile and optimize runtime performance using Unity Profiler, including improvements to update loops, object pooling, draw calls, loading, and coroutine usage; procedural scenes support hundreds of dynamically generated objects.

• Integrated FMOD and implemented C#-driven audio systems using events, parameters, and runtime calls; also worked with DOTween, FEEL, Spine, shaders, Unity Input System, and WebGL deployment.

Happy — Game Development & Programming Instructor

Oct 2024 – Jun 2025 | On-site | Contractor

• Taught game development and programming fundamentals to children and teenagers using Unity, Unreal Engine, GameMaker, and Construct.

• Delivered instruction across programming, Game Design, and general Game Development concepts.

Tamarin Studio — Junior Software Engineer | Unity / C#

Nov 2023 – Jun 2024 | Remote | Contractor

• Served as the sole software engineer on Excommunicated, implementing core gameplay and project functionality in Unity and C#.

• Built gameplay systems spanning player movement, combat, UI, inventory, enemies, save/load, dialogue, camera, input, and audio.

• Designed and implemented a localization-aware typing combat system in which enemies dynamically select battle words from language-specific word banks.

• Collaborated with Game Design using GitHub for version control and integrated FMOD and DOTween into the project.

• Contributed to a PC title that reached a public Steam demo before development was cancelled.

Toninha Games — Junior Software Engineer | Unity / C#

Jul 2023 – Feb 2024 | Remote | Contractor

• Developed gameplay features for Among Animals: Pets Rescue, a mobile vertical endless runner built in Unity and C#.

• Contributed to gameplay implementation and maintenance under technical direction.

• Contributed to a project released on the Google Play Store.

Super Geeks — Game Development & Programming Instructor

2022 – 2023 | On-site | Contractor

• Taught game development and programming to children and teenagers using Unity and Unreal Engine.

• Delivered instruction in programming, Game Design, and general Game Development while adapting lessons within the established curriculum.

Independent Game Developer

Nov 2021 – Nov 2022 | Volunteer / Independent Projects

• Developed small-scale Unity and C# projects in collaboration with small teams across game jams, volunteer work, and independent development.

• Contributed programming to Nous, a task-based game featuring enemy pursuit and pathfinding, and participated in Game Design for the project.

• Developed gameplay for Eu, Pilho, a 2D platform action game with combat, while also contributing to Game Design.

Editora PINI — Front-End Intern

Apr 2017 – Sep 2017 | On-site | Internship

• Maintained institutional website pages using HTML, CSS, and WordPress.

• Performed visual adjustments and published and updated web content.

FEATURED GAME PROJECT

Kundara: Art of Cards — Software Engineer | Unity / C#

Roguelite Card Game | PC | In Development

• Designed and implemented the game's dynamic procedural map and progression system, generating rule-based nodes with branching and converging paths driven by ScriptableObject content.

• Contribute to gameplay architecture and systems using managers, state machines, event-driven patterns, interfaces, and clear separation of responsibilities.

• Build internal development tools for QA and Game Design, including configurable Build Modes and a Save Editor workflow.

• Profile and improve runtime performance with Unity Profiler through work on update loops, object pooling, draw calls, loading, and coroutine usage.

• Integrate supporting technologies including FMOD, DOTween, FEEL, Spine, Unity Input System, shaders, and WebGL workflows.

EDUCATION

Universidade Anhembi Morumbi — São Paulo, Brazil

Bachelor's Degree in Digital Design | 2014–2022

Relevant coursework: User Experience (UX), User Interface (UI), Digital Operations, Audiovisual Content Production, Programming Fundamentals, Digital Marketing

ADDITIONAL TRAINING

NoneClass

Game Development Program | Completed 2021

Relevant training: C#, Unity, GameMaker, Programming Fundamentals, Game Development Fundamentals

SAGA — School of Art, Game and Animation

Playgame — Game Development Program | Completed 2011

Relevant training: 3D Modeling, Rigging, Adobe Photoshop, UDK / Unreal Engine, Blueprints, C++

LANGUAGES

Portuguese — Native

English — Fluent / Professional Working Proficiency
